Projects

Personal Resume Website
   A portfolio website designed using the Materialize CSS

Github Link: https://github.com/ankitjain28may/ankitjain28may.github.io
Webiste Link: http://ankitjain.esy.es

Carpool Website
   This is a website designed during the hackathon organised by IEEE DTU. The
theme of this website is carpool like a person who is located at somewhere and
he has a car he can share his car among the persons who have same current
location as well as same final destination so they can manage their cars one by
one for their work. This will help them financially as well as help everyone by
checking Air Pollution and many others
I worked on the backend of this website used PHP and MySQL

Github Link: https://github.com/ankitjain28may/carpool
Webiste Link: http://fastcarpool.esy.es/drive

Save Food website
   This is a website designed during the hackathon organised by MAIT, Delhi. The
theme of this website is to save food by informing the college mess regarding
children whether they are attending the mess or not so as to save the food and if
left we have connected societies which will use this food to feed the poor people.
I worked on the backend of this website used PHP and MySQL.
